17 March 2020

Dear Parents/Carers

The school is open and we will continue to support all children who arrive each morning until the school has a directive to close.

The school are aware of the changes in Government guidance.

If your child is in any of the following groups you need to follow the guidance for people at increased risk and follow the recommendations on social distancing outlined below:

This is the following guidance from the GOVERNMENT:

We are advising those who are at increased risk of severe illness from coronavirus (COVID-19) to be particularly stringent in following social distancing measures.

This group includes those who are:

- aged 70 or older (regardless of medical conditions)
- under 70 with an underlying health condition listed below (ie anyone instructed to get a flu jab as an adult each year on medical grounds):
 - chronic (long-term) respiratory diseases, such as asthma, chronic obstructive pulmonary disease (COPD), emphysema or bronchitis
 - chronic heart disease, such as heart failure
 - chronic kidney disease
 - chronic liver disease, such as hepatitis
 - chronic neurological conditions, such as Parkinson's disease, motor neurone disease, multiple sclerosis (MS), a learning disability or cerebral palsy
 - diabetes
 - problems with your spleen – for example, sickle cell disease or if you have had your spleen removed
 - a weakened immune system as the result of conditions such as HIV and AIDS, or medicines such as steroid tablets or chemotherapy
 - being seriously overweight (a BMI of 40 or above)
- those who are pregnant

Note: there are some clinical conditions which put people at even higher risk of severe illness from COVID-19. If you are in this category, next week the NHS in England will directly contact you with advice the more stringent measures you should take in order to keep yourself and others safe. For now, you should rigorously follow the social distancing advice in full, outlined below.

People falling into this group are those who may be at particular risk due to complex health problems such as:

- People who have received an organ transplant and remain on ongoing immunosuppression medication
- People with cancer who are undergoing active chemotherapy or radiotherapy

- People with cancers of the blood or bone marrow such as leukemia who are at any stage of treatment
- People with severe chest conditions such as cystic fibrosis or severe asthma (requiring hospital admissions or courses of steroid tablets)
- People with severe diseases of body systems, such as severe kidney disease (dialysis)

What is social distancing?

Social distancing measures are steps you can take to reduce the social interaction between people. This will help reduce the transmission of coronavirus (COVID-19).

They are:

1. Avoid contact with someone who is displaying symptoms of coronavirus (COVID-19). These symptoms include high temperature and/or new and continuous cough;
2. Avoid non-essential use of public transport, varying your travel times to avoid rush hour, when possible;
3. Work from home, where possible. Your employer should support you to do this. Please refer to [employer guidance](#) for more information;
3. Avoid large gatherings, and gatherings in smaller public spaces such as pubs, cinemas, restaurants, theatres, bars, clubs
4. Avoid gatherings with friends and family. Keep in touch using remote technology such as phone, internet, and social media.
5. Use telephone or online services to contact your GP or other essential services.

Everyone should be trying to follow these measures as much as is pragmatic.

For those who are over 70, have an underlying health condition or are pregnant, we strongly advise you to follow the above measures as much as you can, and to significantly limit your face-to-face interaction with friends and family if possible.

This advice is likely to be in place for some weeks.

All members of a family where one person is showing any symptoms must self-isolate for 14 days.

If we reach a situation where we have insufficient staff to provide safe care we may have to close the school. In this instance we will provide as much notice as possible and ensure your child is cared for until they are collected.

It may be that due to the spread of the virus staff are unable to come to work we are unable remain open.

If you choose to self-isolate your child or family as the above information states your child/children will not be allowed back into school until the 14 days have expired.

Yours sincerely

A Feeley

Executive Head Teacher
